

**PROGRAM OUTCOMES**  
**(Revised 6/06)**

Upon completion of the program, the graduate is a nurse generalist who will:

1. Practice within the broad spectrum of health care settings to promote, maintain, and restore health across the life span.
2. Provide culturally sensitive quality nursing care to individuals, families, groups, and communities in a diverse society.
3. Engage in nursing practice that is founded upon a framework of professional values and legal/ethical standards.
4. Participate in professional activities that help define the scope of nursing practice, set health care policies, and improve the health of the public.
5. Maintain professional competence by engaging in an ongoing process of self-assessment and learning.
6. Collaborate with clients, health care providers, agencies, and members of the general public to promote the achievement of health care goals.
7. Synthesize evidence-based knowledge from nursing, scientific, and humanistic disciplines in making professional practice decisions.
8. Demonstrate the ability to utilize information and communication technology to enhance healthcare outcomes.
